

Self-Directed Plans Quarterly Performance Update | 4th Quarter 2017

How to read this chart:

The rows of data shaded blue indicate the funds available through Fidelity Investments Standard Plan Options.

▲ The rows with no shading indicate the benchmark the fund listed above is measured against.

Fee Disclosure for each fund may be found on Page 3. FPPA Assessed Administrative Fees and a Glossary of Terms may be found on Page 4. Data in this handout has been provided by AndCo Consulting, Inc. (formerly Bidart & Ross, Inc.)

The historical performance for certain funds listed, may show longer time periods than what can be found in the Fidelity Investments materials or websites. AndCo Consulting, our investment advisor has extended the historical performance of certain funds by combining the returns for share classes of the same fund that have a longer performance history. As an example, The American Funds New Perspective R6 share class has only been available to investors since May 1, 2009. However, the New Perspective Fund A share was originally opened to investors on March 13, 1973. Both funds are managed in an identical fashion with the only difference being the lower expense ratio for the R6 share class. It is important to remember the past performance does not guarantee future results.

FPPA Fee Disclosure by Fund | 4th Quarter 2017

Participant accounts are charged the **Net Expense Ratio** listed below. The **Net Expense Ratio** reflects a reduction of the funds gross expense due to the fact that certain fees have been waived by the investment manager. **The fund performance returns shown are net of the expense ratio.** The *administrative fees* listed on Page 4 are also deducted from the member's account and will be reflected on the quarterly statement. The revenue sharing amount shown is part of the expense ratio, not an additional fee.

FPPA understands that the fees and expenses of the investments you select have an impact on the overall returns of your portfolio. Therefore, on July 8, 2015, the share class of several investment options offered through the Plans changed. The new share class offers the same investment strategy and risk, but the overall expenses are lower. The share class changes are reflected below.

See *Glossary of Terms* on Page 4 for more information.

Administrative Fee Schedule Chart

The FPPA Self Directed Plans Committee (SDPC) has evaluated all costs associated with providing the self-directed plan offerings for our members for the past year and has set the following fee schedule for 2017. We are pleased to announce that a fee holiday is in place for one of the plans.

2017 Administrative Fees for these Self-Directed Plans	Annual Fee Deduction in January	Quarterly % Deduction in March, June, September and December
FPPA 457 Deferred Compensation Plan	\$10	0.032%
Statewide Hybrid Plan - Money Purchase Component	\$10	0.036%
Separate Retirement Account (SRA) self-directed assets only	\$10	0.034%
Deferred Retirement Option Plan (DROP) self directed assets only	\$10	0.037%
Statewide Money Purchase Plan	\$10	0.000%*

* A fee holiday is in place for this plan for 2017, therefore no administrative fee will be deducted from your account in 2017. This is due to the plan having sufficient forfeitures or revenue sharing to cover the expected annual administrative costs. The administrative cost of each plan is reviewed annually and the administrative fee is adjusted as necessary.

Glossary of Terms

Equity Wash Provision

This provision is commonly found in stable value products which stipulates that any transfers made from the stable value fund must be first directed to a “non-competing” fund (typically an equity fund) in the plan for a stated period of time (typically 90 days). After the time period has lapsed, the transferred funds may then be directed to the “competing” fund (such as a money market fund or brokerage window). This provision is intended to reduce interest rate arbitrage by plan participants, thus permitting stable value contract issuers to underwrite the plan without the excessive risk exposure.

Prospectus Gross Expense Ratio – Maximum allowed by the Prospectus

The percentage of fund assets used to pay for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund, except brokerage costs. Fund expenses are reflected in the fund’s net asset value (NAV). It should be noted that the funds offered within the FPPA Plans do NOT have sales charges and, therefore, are not reflected in the expense ratios.

Prospectus Net Expense Ratio – Actual Amount Investors Pay

The percentage of fund assets, net of reimbursements or waivers, used to pay for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund, except brokerage costs. Fund expenses are reflected in the fund’s net asset value (NAV). It should be noted that the funds offered within the FPPA Plans do NOT have sales charges and, therefore, are not reflected in the expense ratios.

An example of the Net vs Gross Expense Ratio - XYZ Equity Fund has a stated gross expense ratio in the prospectus of 1.20% but the Fund’s

management has elected to waive 0.20% of their fees. Therefore, the Fund has a net expense ratio of 1.00%, which is what is deducted from the Fund return or NAV.

Redemption Fee

An annual amount charged when assets are withdrawn from some funds before a minimum amount of time has elapsed since the original investment was made in the Fund. Unlike deferred fees, however, most redemption fees go back into the fund itself, rather than into the fund company’s pockets, and thus do not represent a net cost to shareholders. These fees are applied on a first-in-first-out basis.

An example of how a redemption fee works – If an investor were to invest into the Gabelli Small Cap Growth Fund, they should be aware that the fund imposes a redemption fee of 2% if they were to sell out of the Gabelli Small Cap Growth Fund before 7 days of investment. As long as the money remains invested in the fund at least 8 days, no redemption fee would be imposed. There is only one fund within the plan that has a redemption fee. Please see the Fee Disclosure by Fund exhibit.

Revenue Sharing

An amount of the Net Expense Ratio that is given back to plan service providers. The revenue sharing is used to offset legitimate plan expenses that include: recordkeeping, administration, communications and other advisory services. It is important to note that this is not an additional fee imposed by the fund, but is a component of the Net Expense Ratio.

An example would be the Harbor International Fund, which has an annual net expense of 0.79%, if you look at the Fee Disclosure by Fund it shows that the fund offers revenue sharing of 0.10%. This simply means that the fund company is getting 0.79% minus 0.10% or 0.69% and Fidelity receives 0.10%, which is used to offset recordkeeping and administrative expenses.
